

# A BRILLIANT SOFTWARE *for* Controlling Your Business

**i-center** the **BEST** Solution to Control Your Business

## What is I-center?

- Touch & Pos Centralized Control system
- POS Oriented Application
- Inventory Module
- Centralized Promotion Setting
- Dynamic Report Tool
- Toward Multi outlet and franchise direction
- Online version without SOCKET Fee

Your Expansion Made Simple 

# Flexible, affordable **multi-POS console** for outlets expansion

## I already have Point Of Sales System at all my stores, what can i-Center do more?

i-Center is designed to handle point of sales across multiple outlets, locations or regions. It lets you segment outlets by business type, by location, by demographics, by region, by products divisions etc. Standardize or personalize campaign can be automated across fast .

i-Center provide flexibility so you can deploy campaign across outlets, be it in line with corporate priorities or adapt to locality trends & requirements. Acting as central operations console, i-Center prioritize the essence of retail/ F&B business, keep tabs on inventory/ menu distribution, royalty program, promotion setting, discount offers, price factors & so on.

It ease up team's bulk of operation resources, boost great efficiency, making retail/ F&B business catch up with current trends & make better revenue, delivering quick 'wins' at the locations or regional level. The ultimate 'POS management tool' also enables team's upcoming follow-ups. Dimensional reports or analysis summary can be reviewed & cross reference or summarized. Analysis can be reviewed by separate entity, summarized or in consolidated manner. Headquarter or region can assign campaign, monitor results and optimize every outlet/ region performance, ideal for business expansion!

## Key Benefits
